#### MANAGEMENT DISCUSSION AND ANALYSIS

#### **FINANCIAL REVIEW**

The tourism, hospitality and gaming industries continued to recover in year 2022, aided by the removal of COVID-19 preventive measures in gaming outlets and the easing of cross-border travel restrictions especially in the ASEAN regions. The Group has reported positive results in 3<sup>rd</sup> and 4<sup>th</sup> quarters due to these positive developments in year 2022.

The table below highlights the Group's financial performance for year 2022:

RM272.5 million

PROFIT/(LOSS) BEFORE TAX

NET PROFIT/(LOSS) **ATTRIBUTABLE** TO SHAREHOLDERS

14.6 million 2021: (RM10.3 million)

PROFIT/(LOSS) AFTER TAX

SHAREHOLDERS' EQUITY

PROFIT/(LOSS) PER SHARE

Earnings before interest, taxation, depreciation, amortisation, impairment of property, plant & equipment, intangible assets and investments.

#### **Revenue and Profit Before Tax**

The Group recorded revenue of RM272.5 million in 2022, an increase of RM57.6 million as compared to RM214.9 million in the previous year mainly due to the increase in number of products sold and improvement in operations followina favourable market conditions.

As a result, the Group recorded a profit before tax of RM8.7 million in 2022, as compared to loss before tax of RM7.5 million in 2021.

#### Liquidity and Capital Resources

As part of its overall liquidity management, the Group preserves sufficient levels of cash and cash equivalents to meet its working capital requirements. With the improvement in revenue and EBITDA, cash and cash equivalents stood at RM70.8 million as at 31 December 2022. The Group maintained deposits with licensed banks of RM33.9 million as at 31 December 2022, compared to RM5.4 million in the previous year. The increase in deposit is mainly due to the positive cash flow for the financial year and the advances received from the customers during the year.

In addition, the Group strives to maintain available banking facilities at a reasonable level to its overall debt position. The Group has zero borrowings as at 31 December 2022, reducina from RM13.6 previously.

The Group's capital expenditure ("CAPEX") increased from RM2.1 million in 2021 to RM13.9 million in 2022, of which RM9.5 million was allocated to upgrade the current EGM in existing TSM outlets.

#### MANAGEMENT DISCUSSION AND ANALYSIS

#### **OPERATIONAL REVIEW**

#### **SSM Division**

The revenue for SSM division increased by 15% for the year ended 31 December 2022 as compared to previous year mainly due to increase in number of products sold.

However, the profit before tax decreased by 14% mainly due to higher travelling and marketing expenses in current year to reconnect with the customers after the long covid break.

#### TSM Division

The revenue for TSM division increased by 52% for the year ended 31 December 2022 as compared to previous year mainly due to better performance and increase in operating capacity in most of the outlets.

On 28 December 2022, a fire incident happened in 2 TSM outlets in Cambodia which resulted a write-off of property, plant and equipment of approximately RM5.9 million. Excluding this one-off event, TSM division has breakeven in 2022. The said property, plant and equipment are fully insured and the Group expects a full recovery from insurance compensation in 2023.

#### **Engineering Services Division**

The Engineering Services division registered revenue of RM2.0 million in 2022 and RM0.5 million in prior year. The division recorded higher EBITDA and pre-tax profit of RM1.6 million in 2022, versus RM0.5 million previously.

#### **DIVIDEND**

The Board has proposed a final singletier dividend of RM0.001 per ordinary share, subject to the shareholders' approval at the forthcoming Annual General Meeting ("AGM"). The dates of entitlement and payment are stated in the Notice of AGM.

The Board continues to explore, over the long term, the establishment of a formal dividend policy, keeping in mind the requisite investments needed to execute our expansion plans, especially in the growing market like the Philippines. The priority for us is to build a sustainable growth path that will be beneficial to both the Group and shareholders.

#### **BUSINESS RISKS**

The Group's main business risks comprise intensifying competition, changes in regulations and policies, and fluctuation of foreign exchange rates.

The Group's business is in a competitive environment and faces competition from other gaming suppliers and operators. With our businesses located in various countries in Asia, changes in each country's regulations and policies may have impact on our operations. These include issues such as minimum wages, restrictions on local residents entering gaming establishments, increase in gaming taxes and foreign exchange control.

The Group is also exposed to risk of fluctuation in foreign exchange rates as Group's global operations necessitate dealings in foreigndenominated currency. Although the Group does not have a currency hedging policy at the moment, a significant part of the currency risk is naturally hedged as most of the Group's cost of sales and operating expenditures are denominated in the same currency as the respective revenues.

#### **BUSINESS OUTLOOK AND PROSPECTS**

The tourism and hospitality industries are expected to continue recovering, aided by the reopening of border restrictions and increase in international travels especially in the regions where the Group operates. Based on the favourable market outlook, the Group expects to perform significantly better in the financial year ending 31 December 2023, backup by the strong orders secured to date, despite facing inflationary pressure on its operating costs.

#### **ACKNOWLEDGEMENT**

On behalf of the Board, we wish to express our deep gratitude to our valued shareholders for their continued confidence in us. We also wish to express our sincere appreciation to our business partners and financial institutions for their unstinting support and faith in us throughout the year.

Last but not least, we would like to thank our fellow directors, management team and employees for their dedication and invaluable contributions. Our turnaround to profitability will not be possible without their hard work, solidarity, cooperation and support.

#### **Natural Disaster**

RGB is also aware of the potential impacts of unprecedented natural disasters on the health, safety, and continuity of our business operations in the countries where we operate. We have established relevant processes and internal controls to ensure business continuity in the face of such disasters. An Emergency Response team is established to monitor and manage the risks arising from natural disasters. In the event of such disasters, our Regional Head is responsible for ensuring the safety of employees and company assets during evacuation, as well as reporting and providing updates to RGB headquarter in Penang, Malaysia.

#### SUSTAINABILITY STATEMENT

We have developed an Emergency Protocol for all regions that are exposed to natural disaster. The protocol provides guidelines to the Group on the evacuation process (including the routes) within our premises in the event of a natural disaster. The guidelines stipulated are aligned with the evacuation plan set up by the building operator/owner.

We have also implemented additional measures as mitigation plans for the occurrence of natural disaster:

#### **Evacuation diagram**

All properties are equipped with evacuation plan and layout to ensure that the employees and/or customers are aware of and well informed.

#### **Automated back-up system**

Back-up system is set-up for every property.

Information and data are automatically backed-up on daily basis.

#### **Emergency preparedness**

High-runner EGM are placed at a higher level to prevent damage from floods, typhoons and earthquakes.

Staff are alerted on forecasts and warnings of impending disasters for early preparation.

Our employees and EGM are covered with group insurance to minimise the potential loss in such eventualities.

#### **Drills and trainings**

Various trainings are conducted on annual basis, namely fire and earthquake drill and first aid and fire prevention training. We ensure at least a minimum of 2 drills are carried out for different types of natural disaster.

Trainings are carried out in the buildings, casinos and outlets by the properties' owner and RGB's control operations.

Regular trainings are also being conducted for employees who are directly involved in the disaster handling procedures including equipment handling and evacuation exercise.

In the FY2022, although there were 13 natural disasters occurred in the countries where we operate, we recorded zero fatalities and injuries, and we do not suffer from any financial loss from the occurrences.

Throughout their tenure of service, they have acted in the best interest of the Company and have continued to exercise independent judgement and due care;
- iv) They have not developed, established or maintained any significant relationship, which would impair their independence as Independent Directors, with the Executive Directors and major shareholders other than normal engagements and interactions on a professional level consistent and expected of them to carry out their duties as Independent Non-Executive Directors, Chairman or member of the Board Committees; and

### INTRODUCTION

The Board of RGB is committed to maintain an internal control and risk management in the Group and is pleased to provide the following Statement on Risk Management and Internal Control ("Statement"), which outlines the nature and scope of the risk management and internal controls of the Group in 2022.

For the purpose of disclosure, the Board has taken into consideration the enumerations encapsulated in the Statement on Risk Management and Internal Control: Guidelines for Directors of Listed Issuers ("Guidelines"), a publication endorsed by Bursa Securities pursuant to Paragraph 15.26(b) of the MMLR.

### **BOARD RESPONSIBILITY**

The Board affirms its overall responsibility for the Group's system of internal control and risk management practices, and for reviewing its adequacy and effectiveness to ensure shareholders' investment, interest and the Group's assets are safeguarded.

The system of internal control covers not only financial controls but operational and compliance controls and risk management procedures. In view of the limitations inherent in any system of risk management and internal controls, such system put into effect by the management is designed to manage rather than to eliminate risks that may impede the Group's achievement of the corporate objectives. Therefore, such system can only provide reasonable and not absolute assurance against material misstatement or loss, contingencies, fraud or irregularities.

The Board has in place an on-going process for identifying, evaluating and managing the significant risks encountered by the Group. The Board, through its Audit Committee, reviews the results of this process, including mitigating measures taken by the management via the CRRA Committee to address areas of key risks identified. This process has been in place for the financial year under review and up to the date of approval of this Statement for inclusion in the Annual Report of the Company.

The Audit Committee assists the Board in reviewing the adequacy and effectiveness of the system of risk management and internal controls in the Group and to ensure that an appropriate mix of techniques is used to obtain the level of assurance required by the Board.

### **RISK MANAGEMENT**

The Board is guided by Practices 10.1 and 10.2 of the MCCG which calls for the establishment of an effective risk management and internal control framework to be implemented across the Group. The adopted ERM framework includes an on-going risk management process carried out by the CRRA Committee. Risks may be associated with internal or external factors including turnover of key personnel, changes in the economic and political environment, competition, introduction of new rules and regulations, technological advancement and other matters relevant to the Group. For each of the key risks identified, the respective divisional head or manager is responsible to continuously monitor the implementation of risk mitigation action plans and update to the Board via CRRA Committee.

Risk tolerance limits are set to align the risk appetite, with the consideration of likelihood of occurrence and severity of consequences, are subject to review periodically. Existing controls to mitigate and manage these risks are then re-assessed and strengthened.

### STATEMENT ON RISK MANAGEMENT AND INTERNAL CONTROL

The CRRA Committee also deliberates and reports to the Board, inter alia, on the following matters:

- Monitor trade collection and recommend appropriate actions to recover overdue debts, if any;
- ii) Evaluate and review special credit term offered to selected customers;

### INTERNAL AUDIT FUNCTION

During the FY2022, the internal audit function of the Group is outsourced to an independent professional firm, which assists both the Board and the Audit Committee by conducting independent assessment of the adequacy and effectiveness of the Group's internal control system. To ensure independence from management, the internal auditors report directly to the Audit Committee through the execution of internal audit work based on a risk-based internal audit plan approved by the Audit Committee before the commencement of work. The internal audit work is carried out based on the appointed firm's Internal Audit Methodology, which is closely aligned with the International Professional Practices Framework ("IPFF") of the Institute of Internal Auditors.

The internal audit report outlines the improvements opportunity from these audits together with the management's response and proposed action plans based on root cause analysis performed are presented to the Audit Committee for its review.

During the financial year under review, the following internal audit was carried out to assess the internal control systems:

Audited Areas	Reporting Month
TSM outlet management (Philippine region)	November 2022

In addition, the internal audit function also followed up on the implementation of recommendations from previous cycles of internal audit and updated the Audit Committee on the status of management-agreed action plan implementation.

The other key elements of the Group's internal control systems are described below:

### (a) Limits of Authority and Responsibility

Documented limits of authority, responsibility and accountability have been established through the relevant charters and TOR, organisational structures and Expenditure Controls and Delegation of Authority Policy. These enhance the Group's ability to achieve its strategies and operational objectives. The divisional structure further enhances the ability of each division to focus on its assigned core or support functions within the Group.

### (b) Written Policies and Procedures

A set of documented internal policies and procedures for each department is in place and is subject to regular review and update. This helps to ensure internal control principles and mechanisms are embedded in the operations of the Group.

### Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control of the Group and of the Company.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group or of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- (f) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

### INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF RGB INTERNATIONAL BHD.

### Auditors' Responsibilities for the Audit of the Financial Statements (continued)

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on Other Legal and Regulatory Requirements

In accordance with the requirements of the Companies Act 2016 in Malaysia, we report that the subsidiaries of which we have not acted as auditors, are disclosed in Note 14 to the financial statements.

### **Other Matters**

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

#### 4. OPERATING SEGMENTS

For management purposes, the Group is organised into business units based on their products and services, and has four (4) reportable operating segments as follows:

(i) Sales and marketing Sales and marketing of gaming machines and systems and related products.

(ii) Technical support and management

Technical support, maintenance and management of gaming machines and

equipment.

(iii) Engineering services Engineering, maintenance and repairing charges.

(iv) Others Renting of property, manufacturing, research and development.

Operating segments are defined as components of the Group that:

- (a) Engage in business activities from which it could earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group);
- (b) Whose operating results are regularly reviewed by the chief operating decision maker of the Group in making decisions about resources to be allocated to the segment and assessing its performance; and
- (c) For which discrete financial information is available.

The Group evaluates performance on the basis of profit or loss from operations before tax not including unallocated expenses and non-recurring losses, such as goodwill impairment.

Inter-segment revenue is priced along the same lines as sales to external customers and is eliminated in the consolidated financial statements. These policies have been applied consistently throughout the current and previous financial years.

Segment assets exclude tax assets and assets used primarily for corporate purposes.

Segment liabilities exclude tax liabilities and unallocated liabilities. Even though loans and borrowings arise from financing activities rather than operating activities, they are allocated to the segments based on relevant factors (e.g. funding requirements).

Diluted earnings/(loss) per ordinary share for the financial years ended 31 December 2022 and 31 December 2021 equal basic earnings/(loss) per ordinary share because there are no potentially dilutive instruments in existence as at 31 December 2022 and 31 December 2021 respectively.

#### 13. INVESTMENT PROPERTIES (continued)

- (a) Investment properties are initially measured at cost, including transaction costs. After initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment losses.
- (b) Depreciation is calculated to write off the cost of the investment properties to their residual value on a straightline basis over their estimated useful life. The principal depreciation rates range from 2% to 2.45%.
- (c) Rental income generated from rental of investment properties of the Group during the financial year amounted to RM726,155 (2021: RM1,118,276).
- (d) Direct operating expenses arising from the investment properties generating rental income during the financial year amounted to RM88,961 (2021: RM82,933).
- (e) The Group has entered into a non-cancellable lease agreement on its investment properties for terms of one (1) to two (2) years (2021: five (5) years) and renewable at the end of the lease period subject to an increase clause. The monthly rental consists of a fixed base rent.

The Group has aggregate future minimum lease receivable as at the end of each reporting period as follows:

	Group	
	2022 RM	2021 RM
Less than one (1) year One (1) to two (2) years	204,949 85,501	1,126,170
	290,450	1,126,170

(f) The fair value of the investment properties of the Group is categorised as follows:

		Group	
	2022 (Level 3) RM	2021 (Level 3) RM	
Buildings	43,407,169	39,727,732	

There is no transfer between levels in the hierarchy during the financial years ended 31 December 2022 and 31 December 2021.

The fair value of the investment property amounted to RM40,301,196 is determined based on the valuation exercise carried out by the external and independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of property being valued. It has been derived from observable recent transacted prices of similar properties in the local market with adjustments made for differences in time element, location, frontage, shape, size, lot type, tenure and other relevant factors. The estimated fair value would be higher if the differential rate is lower and vice versa.

The fair value of the investment properties amounted to RM3,105,973 are determined based on Directors' estimation by reference to market evidence of transaction prices of similar properties in the vicinity and same category. The significant unobservable input into this valuation method is adjustment factors to prices of comparable properties. The estimated fair value would increase if the transaction prices were higher and vice versa.

31 DECEMBER 2022

However, the fair value of the investment properties reflects the highest and best use of the said property should the investment properties be disposed. - (a) The Group leases a number of properties in the location which it operates. The leases of properties comprise only fixed payments over the lease terms.
- (b) The right-of-use assets are initially measured at cost, which comprise the initial amount of the lease liabilities adjusted for any lease payments made at or before the commencement date of the leases.

After initial recognition, the right-of-use assets are stated at cost less accumulated depreciation and any accumulated impairment losses, and adjusted for any re-measurement of the lease liabilities.

The right-of-use assets are depreciated on a straight-line basis from the commencement date to the earlier of the end of the estimated useful lives of the right-of-use assets or the end of the lease term. The lease terms of right-of-use assets are as follows:

Land 99 years Buildings 2 - 40 years

#### 17. INTANGIBLE ASSETS (continued)

- (a) Goodwill recognised in a business combination is an asset at the acquisition date and is initially measured at cost. After initial recognition, goodwill is measured at cost less accumulated impairment losses, if any. Goodwill is not amortised but instead tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying amount could be impaired.
- (b) Development costs refer to development of games and platform unit for the production of gaming machines. Upon the completion of the project, the development costs are amortised on a straight-line basis over the commercial lives of the underlying products not exceeding five (5) years. The amortisation charges are included in the statements of profit or loss under administrative expenses.
- (c) Gaming licenses are initially measured at cost. After initial recognition, gaming licenses are measured at cost less accumulated impairment losses, if any. Gaming licenses have indefinite useful lives as based on all relevant factors there is no foreseeable limit to the period over which the licenses are expected to generate cash inflows. Gaming licenses are not amortised but tested for impairment annually or more frequently if the events or changes in circumstances indicate that the carrying amounts may be impaired. The useful life of gaming licenses is also reviewed annually to determine whether the useful life assessment continues to be supportable.
- (d) Rights relate to the use of Manny Pacman's design and theme in the development of games and jackpot display for gaming machines. The rights acquired have finite useful lives and are carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation is calculated using the unit of production method to allocate the cost of rights over its estimated useful lives.
- (e) Impairment tests for goodwill with indefinite useful lives

#### Allocation of goodwill

The goodwill has been allocated to the Group's other segment CGU, which constitutes a separately reportable segment in Note 4 to the financial statements.

#### Key assumptions used in value-in-use calculations

The recoverable amount of the CGU have been determined based on value-in-use calculations using cash flow projections based on financial forecasts approved by management covering a five (5)-year period. Cash flows beyond the five (5)-year period are extrapolated assuming zero growth rates.

During the financial year, an impairment of RM870,512 relating to a subsidiary, Nex Gen Studio Limited had been recognised following the ceasation of technical support and management operations in Vietnam.

In the previous financial year, key assumptions and management's approach to determine the values used in value-in-use calculations are most sensitive to the following assumptions:

#### (i) Net revenue

The estimated net revenue with 10% growth rate used to calculate the cash inflows for impairment tests for goodwill is the estimated net collections from technical support and management operations in Vietnam.

#### (ii) Exchange rate

The exchange rate used to translate foreign currencies transactions into the other segment's functional currency is based on the exchange rates obtained immediately before the forecast year. Values assigned are consistent with external sources of information.

31 DECEMBER 2022

#### 17. INTANGIBLE ASSETS (continued)

(e) Impairment tests for goodwill with indefinite useful lives (continued)

Key assumptions used in value-in-use calculations (continued)

#### (iii) Discount rate

The pre-tax discount rate at 15%.

Based on the annual impairment testing undertaken by the Group, no impairment losses were required for the carrying amount of the remaining goodwill assessed as at 31 December 2021 as its recoverable amount was in excess of its carrying amount. Management believes that there is no reasonably possible change in the key assumptions on which management has based its determination of the CGU's recoverable amount, which would cause the CGU's carrying amount to materially exceed its recoverable amount.

(f) Impairment tests for gaming licenses with indefinite useful lives

The gaming licenses have been treated as a single CGU together with the investment property of the Group. It is allocated to the Group's other segment CGU, which constitutes a separately reportable segment in Note 4 to the financial statements.

During the financial year, gaming licenses have been written off due to the Group does not expect to continue using and generating future economic benefit from the gaming licenses.

In the previous financial year, the recoverable amounts of the CGU have been determined based on fair value less cost of disposal, with details being disclosed in Note 13(f) to the financial statements.

Based on the annual impairment testing undertaken by the Group, no impairment losses were required for the carrying amounts of the gaming licenses as at 31 December 2021 as their recoverable amounts were in excess of their carrying amounts. Management believes that there is no reasonably possible change in the key assumptions on which management has based its determination of the CGU's recoverable amount, which would cause the CGU's carrying amount to materially exceed its recoverable amount.

	157,602,956	168,742,704

(f) Impairment for trade receivables that do not contain a significant financing component are recognised based on the simplified approach using the lifetime expected credit losses ('ECL').

The Group considers credit loss experience and observable data such as current changes and future forecasts in economic conditions by geographical segment of the Group to estimate the amount of expected impairment loss. The methodology (roll rate method) and assumptions including any forecasts of future economic conditions are reviewed regularly.

During this process, the probability of non-payment by the trade receivables is adjusted by forward-looking information (gross domestic product ("GDP")) and multiplied by the amount of the expected loss arising from default to determine the lifetime expected credit loss for the trade receivables. For trade receivables, which are reported net, such impairments are recorded in a separate impairment account with the loss being recognised in the consolidated statement of profit or loss and other comprehensive income. On confirmation that the trade receivable would not be collectable, the gross carrying amount of the asset would be written off against the associated impairment.

Individual assessment of impairment of trade receivables are separately assessed when it is probable that cash due will not be received in full.

It requires management to exercise significant judgement in determining the probability of default by trade receivables, appropriate forward-looking information, significant increase in credit risk and estimated cash flows recoverable in worst-case scenarios to assess expected credit losses.

Impairment for trade receivables that contain a significant financing component are recognised based on the general approach within MFRS 9 Financial Instruments using the forward-looking expected credit loss model as disclosed in Note 20(c) to the financial statements.

Credit impaired allowance refer to individually determined debtors who have adverse changes in the financial capability and default or significant delay in payments as at the end of the reporting period. The Group considers trade receivables to be in default when there is no reasonable expectation of recovery.

#### 20. OTHER RECEIVABLES (continued)

(c) Impairment for trade receivables that contain a significant financing component, other receivables, lease receivables, amounts due from subsidiaries and associates are recognised based on the general approach within MFRS 9 using the expected credit loss model adjusted by forward-looking information (gross domestic product ("GDP")). The methodology used to determine the amount of the impairment is based on whether there has been a significant increase in credit risk since initial recognition of the financial asset. At the end of the reporting period, the Group and the Company assess whether there has been a significant increase in credit risk for financial assets by comparing the risk of default occurring over the expected life with the risk of default since initial recognition. For those in which the credit risk has not increased significantly since initial recognition of the financial asset, twelve (12)-months expected credit losses along with gross interest income are recognised. For those in which credit risk has increased significantly, lifetime expected credit losses along with the gross interest income are recognised. For those that are determined to be credit impaired, lifetime expected credit losses along with interest income on a net basis are recognised.

The Group and the Company consider a financial asset to have experienced a significant increase in credit risk when one or more of the following criteria have been met:

- Significant adverse changes in business, financial and/or economic conditions in which the financial asset operates:
- (ii) The financial asset is experiencing notable financial distress and liquidity issues;
- (iii) It is becoming probable that the financial asset will undergo a major financial reorganisation or enter bankruptcy;
- (iv) Delay in payment for more than one (1) year and the financial asset request for renegotiation of the payment terms; or
- (v) Significant change in the credit rating of the financial asset if the information is available.

Credit impaired allowance refer to individually determined debtors who have adverse changes in the financial capability and default or significant delay in payments as at the end of the reporting period. The Group considers other receivables to be in default when there is no reasonable expectation of recovery.

#### 36. CONTINGENT LIABILITIES

- (a) The Group designates corporate guarantees given to financial institutions for banking facilities granted to subsidiaries and trade payables as insurance contracts as defined in MFRS 4 Insurance Contracts. The Group recognises these corporate guarantees as insurance liabilities when there is a present obligation, legal or constructive, as a result of a past event, when it is probable that an outflow of resources embodying economic benefits would be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.
- (b) (i) The Company has given unsecured corporate guarantees to certain financial institutions for banking facilities granted to its subsidiaries for a limit of up to RM35,605,310 (2021: RM43,819,460) of which RM228,886 (2021: RM13,650,060) was utilised at the end of the reporting period.
  - (ii) The Company has given unsecured corporate guarantees to certain trade payables of its subsidiaries for a limit of up to RM97,097,000 (2021: RM91,762,000) of which RM60,345,129 (2021: RM75,964,378) was utilised at the end of the reporting period.
  - (iii) The Directors are of the view that the chances of the financial institutions and trade payables calling upon the corporate guarantees are unlikely. Accordingly, the fair values of the above corporate guarantees are negligible.

#### 37. CAPITAL MANAGEMENT

The primary objective of the capital management of the Group is to maintain a strong capital base, good credit rating and healthy capital ratios to support its businesses and maximise its shareholders' value.

The Group manages its capital structure and makes adjustments to it in response to changes in economic conditions. In order to maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives or policies during the financial years ended 31 December 2022 and 31 December 2021.

The Group monitors capital utilisation on the basis of net debt-to-equity ratio, which is net debt divided by total capital. The Group includes within net debt, borrowings and lease liabilities less cash and bank balances. Capital represents equity attributable to the owners of the parent.

31 DECEMBER 2022

#### 37. CAPITAL MANAGEMENT (continued)

The Company has complied with this requirement for the financial years ended 31 December 2022 and 31 December 2021.

31 DECEMBER 2022

#### 38. FINANCIAL RISK MANAGEMENT

The overall financial risk management objective of the Group is to optimise its shareholders' value and not to engage in speculative transactions.

The Group is exposed mainly to credit risk, liquidity and cash flow risk, interest rate risk and foreign currency risk. Information on the management of the related exposures is detailed below.

#### (a) Credit risk

Exposure to credit risk arises mainly from sales made on credit terms and deposits with licensed banks, which requires loss to be recognised if a counter party fails to perform as contracted. The Group controls the credit risk on sales by ensuring that its customers have sound financial position and credit history. The Group also seeks to invest cash assets safely and profitably with approved financial institutions in line with the policy of the Group.

#### Exposure to credit risk

At the end of each reporting period, the maximum exposure to credit risk of the Group and of the Company is represented by the carrying amounts of each class of financial assets recognised in the statements of financial position.

#### Credit risk concentration profile

As at 31 December 2022, other than the amounts owing by subsidiaries constituting 98% (2021: 100%) of the total receivables of the Company, the Group also has a significant concentration of credit risk that may arise from exposure to groups of receivables which contributed approximately 85% (2021: 91%) of the total trade receivables at the end of the reporting period. These customers contributed approximately 46% (2021: 66%) of the total revenue of the Group. The Group and the Company do not anticipate the carrying amounts recorded at the end of each reporting period to be significantly different from the values that would eventually be received.

#### (b) Liquidity and cash flow risk

The exposure of the Group to liquidity and cash flow risk arises primarily from the mismatch of the maturities of financial assets and liabilities. The Group actively manages its debt maturity profile, operating cash flows and the availability of funding so as to ensure that all operating, investing and financing needs are met. In executing its liquidity risk management strategy, the Group measures and forecasts its cash commitments and maintains a level of cash and cash equivalents deemed adequate to finance the activities of the Group.

#### (c) Interest rate risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures. Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the entity's functional currency. The Group also holds cash and bank balances denominated in foreign currencies for working capital purposes.

Subsidiaries operating in overseas have assets and liabilities together with expected cash flows from anticipated transactions denominated in those foreign currencies.
