(Macau, Exclusive Yogonet.com).- RGB Games exhibited its full range of products at G2E show, introducing two novelties from its own proprietary games. Sources of the firm analyzed the Asian market and consider that it still has potential to grow; they also confirmed that gaming revenue and slot machines revenue show an increasing trend year after year.

---

In recent G2E Macau show, Asia Asian leading supplier RGB Games exhibited two novelties from its own proprietary games: the “Pac Man Progressive Poker Riding” on the famous sports icon in the boxing world, Manny Pacquiao. RGB showcased the Pac Man Progressive Poker – fusing poker and jackpot to bring players the ultimate high in electronic poker.

“Currently featuring two base games with more in the pipeline, Pac Man Progressive Poker is a unique electronic poker product designed for the hardcore poker lovers”, said one of RGB’s Management Team.

Recommended games are Pac-Man’s Wild Pac-Man’s Double and Wang Wang Wang Progressive Jackpot, which is the latest progressive jackpot link with the Fortune God as its main theme. Based on an ancient Chinese folklore, Wang Wang Wang is all about showering luck, money and prosperity to both players and operators alike. With its randomly triggered feature, this four-level progressive features four recommended games as its’ base: Double Dragon, Golden Fa, Fortune Dragon and Prosperity Cat

Besides, on their third-party products, the firm exhibited Elaut's latest Roulette & Grand Sic Bo with deluxe cabinets and Atronic's Oxygen cabinet. Also showcased their JV partnership product, RGB Abbiati's gaming equipment and accessories.

When asked about the G2E show this year, one of RGB's Management Team pointed: "Like previous years, we saw manufacturers revealing new and innovative products especially on new theming with great visual displays. We expected crowds to be increased for the three-day event. Unfortunately, the weather with heavy rains on both days had obviously affected the visitors' arrival to the exhibitions."

With regards to the most important products that RGB commercializes, the firm has been distributing and supplying internationally well-known electronic gaming machines such as AGT, Atronic, WMS, Orion, Elaut to casino operators in Macau for a long time.

"Our long standing relationship established with our business partners in Macau has positioned us as one of the prominent supplier of choice. With the experiences and strong presence built over the years, RGB is blessed with the opportunity to partner with casino operator in Macau and offer our machines concession program and technical support & management," added the source.

"RGB's machines concession program is a unique business model which focuses on concession and leasing of electronic gaming machines as well as providing technical support and operational management at casino and clubs with gaming licenses. In a nutshell, offering machines concession program and sale and distribute of electronic gaming machines and casino equipment are the two important products that RGB has commercializes in this region", the management source concluded.

In a market where players seem to prefer table games, the firm was asked about the strategy of the company for placing its developments, and they mentioned that statistic shows that the demands for slot machines are increasingly popular in many matured markets. "We place great emphasis on building a trustworthy business relationship and keep improving our services with our business partners. We work together to ensure that business opportunities are maximized and consistent high value returns are delivered as we move along with the pace," the management source said, and added: "We have also built our strong presence in many various countries in Asia region other than Macau, i.e. Philippines, Laos, Cambodia and Vietnam. Thus, we are not only developing products that cater to the demand of a single market that prefers table games, but as an integrated gaming solutions provider, we are capable to offer our products and services that cater to the demand of each market. We are looking at broader picture."

Besides, the firm considers that it still has potential to grow, and confirms that gaming revenue and slot machines revenue show an increasing trend year by year.
